

Dear Philip

Thank you for giving us the opportunity to present the project to Scarborough Ramblers and for the welcome I was given. Please find links to the National Park website to the elements of the application that may be of interest. The Environmental Statement is in 5 parts and contains the Environmental Impact Assessment (EIA) of each element of the project. Part 1 is the intro, Part 2 the mine, Part 3 the minerals transport system (MTS), Part 4 the materials handling facility (MHF), and Part 5 the cumulative impact.

The recreation and amenity chapters provide an assessment of the impact of the project on users of PROW etc and I outlined last night. I've provided links to these for the mine and MTS and the appendices that go with them. Also is a link to all the planning documents. Those wishing to view the photomontages should scroll down to Parts 2 and 3 chapter 12 photomontages (chapter 3 is further down towards the bottom of the page). The Guide to the Application is a good start for those wanting to understand what else is involved in the application.

Mine EIA – Chapter 7 Recreation and Amenity
